CASE STUDY: J & P Cycles in Ormond Beach, FL

Before treatment

After MicroGuard[®] treatment

Desired Outcome: J & P Cycles, a retail supplier of premium motorcycle parts and accessories built their first retail store in Ormond Beach, Florida. They required protection of their concrete warehouse floor from chemical spills, dusting and fork lift tire marks. Within their luxurious show room, they required protection from biker-boot heel marks and grout staining so that the floor complimented the ambience of the store. Additionally, they wanted the floors to be easier to clean each night and easier to keep looking great without constant waxing.

Practical Result: MicroGuard AD703 was applied to the concrete warehouse flooring and is fulfilling their performance needs. MicroGuard AD708 was applied to the hard tile & grout and is meeting all expectations; aesthetically and functionally.
