

CASE STUDY:

Marriott Vacation Club Tile Floors – Orlando, FL

Situation: During a recent refurbishing upgrade of the property, it proved more cost effective to utilize Adsil's MicroGuard clear treatment than to install new tile.

Solution: The vacation club cabanas were deep cleaned, the grout received a renewing color seal installation and the tile & grout were then treated with the MicroGuard Clear Gloss Tile Treatment System. Work was affected by Surface Solutions, Inc. and Marblelife, two of Adsil's premier independent certified installation contractors.

Results: At project completion, 132 guest cabanas received the MicroGuard treatment system. The tile & grout floors were restored to a pristine, like-new condition and at a significantly lower cost than floor replacement.
