## CASE STUDY: Brick Pavers are restored using MicroGuard® AD703 Clear

**Situation:** Exterior brick pavers were faded, due to constant sun exposure. The surface was difficult to keep clean. Paver surface was 'dusting' causing a faded appearance.

**Solution:** Apply two coats of MicroGuard® AD703 Clear to seal surface from moisture & prevent dusting, control surface staining, inhibit gum adhesion, make cleaning easier & rejuvenate original color.

**Results:** Surface is now easier to clean and maintain, and is protected from further fading and dusting. The color was restored and enhanced to a like new condition. The surface is protected from staining and discoloration. An additional benefit is that mold & mildew growth on the treated surface is mitigated.
